COLOR AGREEMENT

COLORED PLASTER/DIAMOND BRITE/QUARTZ/ISLAND PEBBLE PLASTER AGREEMENT

CHOICE OF MATERIAL & COLOR **X** _____ **COLOR #** **X** _____

This agreement applies to the pool plastered at this **address**:

Address: _____

Since pool plaster is composed of natural materials that have certain inherent characteristics, some amount of shading or color variation is a natural occurrence which should not be construed as a defect and which only enhances the natural beauty of your pool. Homeowner agrees that the plaster, diamond brite, quartz, and island pebble are **NOT** guaranteed for evenness of color and may not be the exact shade anticipated. The shade and color may vary and fade over time. The plaster, diamond brite, quartz, and island pebble may become streaked, blotchy, or have a mottled appearance over which the contractor has no control. Homeowner understands that crazing (check cracks and hairline cracks) may be noticeable and may be quite pronounced with colored plaster.

Due to atmospheric conditions (humidity, temperature, etc.) during plastering, light and/or dark streaks (a marbled look) may appear in the plaster, diamond brite, quartz, and island pebble and may be more pronounced on a cloudy day or at night with the light on. These conditions are beyond the contractor's control. Homeowner understands that diamond brite, quartz, and island pebble, are exposed aggregate finishes and are rougher than plaster.

Homeowner has read and does accept the above conditions.

X Date: _____ Signed: **X** _____

Accepted by the Plasterers Council

Accepted by the Independent Pool & Spa Service Association

Note: We urge you to contact your pool professional for information specific to your pool or spa.

Chemical treatment alone will not produce sanitary pool water. A filtration system in proper operational condition is also required to attain sparkling clear, polished sanitary water.

For information specific to spas and hot tubs, please refer to your pool & spa professional or to NSPI-3, Standard for Permanently Installed Residential Spas. Additional consumer awareness information is available from the following sources:
